# **Ui** Path

### Choose a Profile

Choose from the list below the profile you'd like to use.

#### **UiPath Studio Pro**

Our most advanced Studio IDE license offering which in addition to Studio comes bundled with testing tools, advanced RPA features and coding services.

#### UiPath Studio

For users looking to build complex unattended or attended process automations. Ideal for users with prior programming experience.

#### **UiPath StudioX**

For business users looking to automate tasks for themselves and their immediate teams. Ideal for users with limited or no experience writing code. X

Choose "UiPath Studio"

	UiPath Studio	<b>9</b> – a x	
	Open	New Project	
Open	Open a Local Project Navigate and open an existing project	Process Start with a blank project to design a new automation process.	
Start	Clone or Check Out Open from source control repositories like GIT, TFS or SVN	Library Create reusable components and publish them together as a library. Libraries can be added as dependencies to automation processes.	
Templates		Template Create a template that you can use in other automation projects.	
Team		New from Template	
Tools Settings		Background Process Create a process that starts in the Background and can run concurrently with other processes for as long as it doesn't use UI interaction.	The UiPath Studio Installation
Help		Orchestration Process         Implement a process through service orchestration and human intervention as well as through long-running transactions.	is completed.
		Robotic Enterprise Framework Create a transactional business process that follows best practices for large scale $\Rightarrow$ deployments.	
		■ Transactional Process Model a process as a flowchart diagram.	
		Grigger Based Attended Automation         Trigger an automation in response to a mouse or keyboard user event.
