

# DP201 - Designing an Azure Data Platform Solution

## Lab 2 – Azure Batch Processing Reference Architectures

### Exercise 3

#### Task 1: Architect an Enterprise-grade conversational bot in Azure.

Use the template below to document the high-level architecture that would form part of an Enterprise-grade conversational bot in AdventureWorks.

Below are examples of the type of requirements that **could** be identified based on the evidence from the case study.

1. An Enterprise-grade conversational bot			
Data Source	Ingestion and Data Storage	Analysis	Visualisation
 Bot Services	 Cosmos DB SQL API
