

# DP201 - Designing an Azure Data Platform Solution

## Lab 3 – Azure Real-Time Reference Architectures

### Exercise 1

#### **Task 2: Build a high level Architecture that reflects performing analysis of real-time social media data in AdventureWorks.**

Use the template below to document the high-level architecture that would form part of performing analysis of real-time social media data in AdventureWorks.

Below are examples of the type of requirements that **could** be identified based on the evidence from the case study.

1. Performing analysis of real-time social media data			
Data Source	Ingestion and Data Storage	Analysis	Visualisation
 Social Media App	 Event Hubs	 Stream Analytics
