

# Chicago Crime

You have been tasked to assist in investigating incidents of crime in the city of Chicago, Illinois. A few things that the stakeholders are specifically interested in:

- A)** Identify the crime hotspots (depicted on a map of Chicago), with with ability to focus on specific crime types.
- B)** What relationships exists (if any) between seasonal patterns have and incidents of crime - focus here to be placed on the temperature as well as the number of hours of daylight.
- C)** If the time of year has any impact on incidence of crime.

# Chicago Crime

For this project we have been asked to create a dashboard which will enable our stakeholders to identify insights through self-discovery.

We have been supplied a number of data files and these cover the period 1 January to 31 December 2018 - this will also form the base of the analysis.
